

Independence Doesn't Stop When the Shift Ends

Overnight, early mornings, a quiet evening in the kitchen... These are the moments when staffing is thinnest and risk is highest. SimplyHome's connected sensors and 24/7 Remote Support team fill those gaps, so individuals can live independently even when in-person coverage isn't possible.

The Technology That Makes It Possible

Tech Spotlight: Overnight Support

Bed and Chair Pressure Pad Sensors

Detects when someone gets up during supported hours and immediately alerts on-site staff or Remote Support. Unacknowledged alerts escalate automatically. Discreet, dignified, camera-free.

Concerns Addressed:

- Overnight monitoring and fall detection
- Wandering & Elopement
- Automatic escalation if alert goes unacknowledged

Door and Motion Sensors

Configured to activate any time motion takes place, these sensors detect exits and unexpected movement without limiting daytime independence. Essential for individuals at risk of wandering or undetected elopement.

Concerns Addressed:

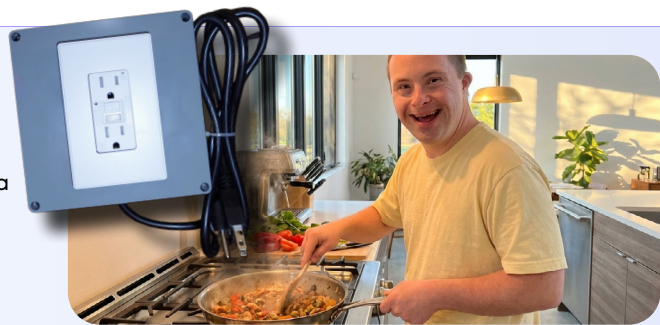

- Wandering, elopement, and overnight exits
- Arrival and departure awareness

“Getting notifications when she does not return to bed gives me great comfort that she's safe.”

- Treska, Daughter of SimplyHome Client

Tech Spotlight: **Cooking Safety** **Stove Sensor and Motion Sensor**

The Stove Sensor alerts when the stove is left on too long. Paired with a kitchen Motion Sensor, it detects when someone has left while cooking and triggers a verbal prompt to return, enabling independent cooking without requiring staff to be in the room.

- Concerns Addressed:
- Unattended stove alerts (electric and induction)
 - Verbal prompts to return to the kitchen
 - Routine building and independent living skills

“Carl adapted immediately to living by himself. The first morning he was home he had gotten up, packed his lunch, and was fully dressed. Instantly that independence kicked right in. ”

- Nicholas, Core Services of Northeast Tennessee

24/7 Coverage by Trained Experts

Behind every alert is a trained Remote Support professional, available 24/7, including nights, weekends, and holidays. They check in, assess, and escalate to in-person support only if needed. Technology and human support integrate to create a seamless experience of autonomy.

90% +

of alerts resolved remotely before escalation.

50%

reduction in daily care costs per person.

5x

improvement in staffing ratios.

Ready to Get Started?

Every SimplyHome system is built around an individual's goals, their home, and their support needs with the goal of enhancing independence with smart technology.
